# Cornerstone – Prism HR Integration Connector

Create a Seamless Link to Learning

Educe's Cornerstone-Prism HR integration connector is a cloud-based application that facilitates easy access to learning for Prism users while minimizing administrative burden. It ensures that user profiles and company hierarchies are always in sync, and makes training assignment and tracking simple for administrators and managers.

The connector keeps five critical user fields synchronized automatically between Prism HR and Cornerstone (users, departments, positions, locations, and divisions). Once the information is in Cornerstone, administrators can assign training dynamically using one identifier, like all users in Sales, or by combining multiple criteria, such as all Customer Service Representatives and Support Analysts in Toronto. Managers are also able to assign training to their team and download training completion reports.
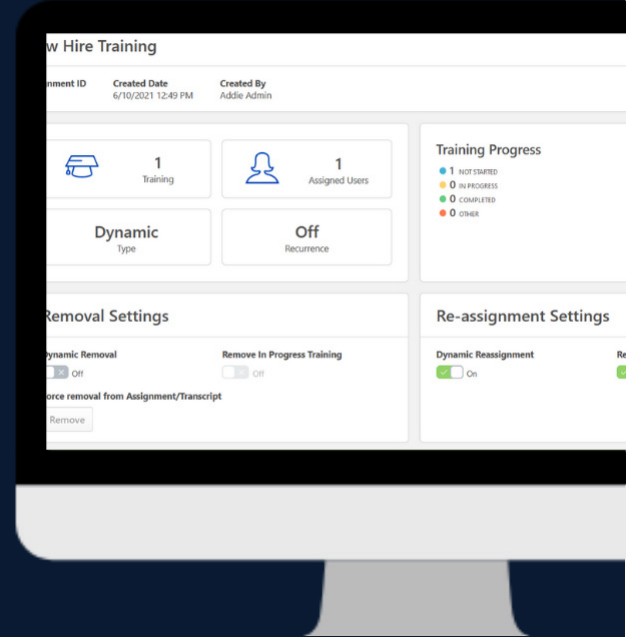

The Benefits

1 Synchronize User Data
Keep user, department, position, location, and division data synchronized between Prism HR and Cornerstone without manual intervention.

2 Easy Setup
Guided by our expert team, the connector is a configurable integration. A configuration guide makes it easy to understand and fast to implement, often in less than 2 weeks.

3 Single Sign-On Enabled
Gain seamless access to Cornerstone without remembering another username and password.

4 Configure Run Time and Notifications
Choose the feed run time cadence that works best and maintain visibility through daily email notifications to system owners.

How It Works

A streamlined experience for users and admins

Once logged into Prism HR, admins click on the 'Learning Center (CSOD)' link and are seamlessly redirected to their Cornerstone account without needing to log into a separate system. If a user is part of more than one client under the same PEO, the integration allows the user to select the client to login under, and will attach the learning history to that company. Users receive one Cornerstone account per client they work with.

By eliminating the manual task of managing user records in multiple systems, your administrators can focus on delivering targeted training assignments in a near real time manner across complex client structures. Daily email summaries provide an easy way to audit changes from your Prism HR setup into CSOD.

Users can access learning seamlessly, and easily see what they have been assigned, as well as the history of training they have completed.
